APPLICATION LETTER

Dear Hiring Manager,

I am writing to express my interest in the advertised IT / Information Systems position in your organization. With a strong academic background in Information Systems and practical internship experience at the Information Network Security Administration (INSA), I am confident in my ability to contribute effectively to your team.

I am currently pursuing a Bachelor of Science (B.Sc.) in Information Systems at Debre Berhan University. My academic training has provided me with a solid foundation in full-stack web development, database management, computer networking, and information security. I have successfully developed responsive and database-driven web applications as part of my academic projects.

During my internship at INSA, I gained hands-on experience in cybersecurity fundamentals, network monitoring, vulnerability assessment, and IT infrastructure support. I collaborated with technical teams to troubleshoot issues, support secure systems, and contribute to technical documentation and compliance processes.

I am self-motivated, detail-oriented, and committed to continuous learning. I work effectively both independently and within a team environment. I am eager to apply my technical skills and grow professionally while contributing to your organization’s success.

I would welcome the opportunity to further discuss how my skills and qualifications align with your needs. Thank you for considering my application.

,
 ,
Sincerely,
Bantalem Mitiku Tafere

 EDUCATION

Bachelor of Science (B.Sc.) in Information Systems

Debre Berhan University — Debre Berhan, Ethiopia
2022 – Present

- Strong academic foundation in Full-Stack Development, Computer Networking, and Information Security
- Practical experience in designing and developing database-driven web applications
- Completed hands-on academic projects involving system analysis, database design, and secure application development

- Developed responsive and scalable web applications using modern development frameworks
- Applied software engineering principles in building small-scale information systems

 PROFESSIONAL EXPERIENCE

IT & Cybersecurity Intern

Information Network Security Administration (INSA) — Addis Ababa, Ethiopia
Internship | 2025

- Assisted in monitoring and analyzing secure IT infrastructure and enterprise application systems
- Supported database administration, structured data management, and system documentation
- Participated in vulnerability assessments and cybersecurity risk analysis
- Collaborated with network and security teams to troubleshoot technical issues
- Gained practical exposure to enterprise network infrastructure and cybersecurity protocols
- Contributed to reporting and compliance documentation
